Automation Applications
Increase Productivity and Profit

EXLAR®

Power / Precision / Proven

Let Exlar[®] help you optimize your manufacturing processes with our energy efficient, robust, and reliable electro-mechanical actuators

Challenge

Safety – Maintaining operator and consumer safety as top priorities.

Productivity – Increasing throughput and consistency to eliminate waste.

Environment – Energy efficiency and reducing impacts to the environment is becoming mandatory.

Adaptability – Operational flexibility to address changes in demand and product offerings.

Power / Precision / Proven

Opportunity

Automation – Reducing the reliance on human labor while creating safer working conditions and increasing system adaptability.

Increase Throughput – Exlar roller-screw based linear actuators, and servomotor based rotary options, provide precision and durability while reducing downtime.

Energy Efficiency – Electric actuators are more energy efficient than fluid power alternatives – saving money and the environment.

Product Options

Universal Actuation with industry leading force capability & performance

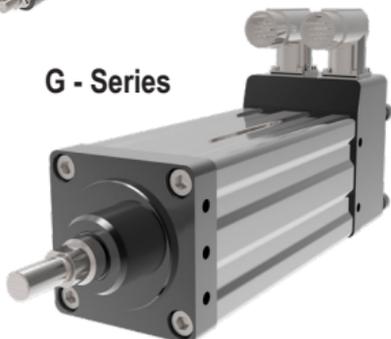

F/K - Series

Tritex® Intelligent Actuation combining control & actuation in a single package

T - Series

G - Series

Integrated Actuation supporting interfaces to most major motion control platforms

*Alternative coatings/materials are available

Benefits of Exlar Actuators

Proven – For over 30 years, Exlar actuation products have been used in a wide range of applications, including mission critical defense applications where failure is not an option.

Precision & Speed – Reduce waste with accurate and repeatable positioning and force.

Power Density – High force and speed in the most compact design on the market.

Flexibility – A wide range of standard options are available, including connectivity to most major automation and control systems.

Total Cost of Ownership (TCO)– Energy efficient and less costly to support over their installed life as compared to hydraulic and pneumatic alternatives provides a lower TCO.

Reliability – Exlar products carry an industry leading 2 Year Warranty*

Coatings/Materials – Exlar can offer housing alternatives to suit specific application requirements, while also keeping equipment costs at a minimum.
