GTF Series

Description

The GTF Series extends Exlar's popular high-force GTX linear actuators into applications that require hygienic machines in Food & Beverage, Packaging, and Pharmaceutical automation systems.

The GTF Series offers flexible solutions coupled with low maintenance features and proven reliability. The GTF food grade actuator mirrors the performance of Curtiss-Wright's standard Exlar GTX actuators and incorporates features to make it easier for machines to achieve hygienic certifications like USDA, 3-A, BISSC, EHEDG, and NSF.

BENEFITS

- Smooth surfaces and FDA approved white epoxy paint reduces cleaning time and insures machine certification
- A stainless-steel main rod provides corrosion resistance nearest to food contact zones
- Different face mount and clevis mount versions of the GTF actuator make it easier to meet hygienic design guidelines with different mounting configurations
- Food grade grease and seal materials eliminate contamination of food products
- Designed to meet 3-A and EHEDG Guidelines
- Long, robust actuator life due to Exlar inverted roller screw technology
- Single or two cable connection for motor power and feedback
- Standard IP67 and optional IP69K environmental ratings

Product Features

Face Mount Configuration

*Only available with certain feedback types

Clevis Mount Configuration

GTF Hygienic Seal System

Making it easier to seal around the actuator thrust rod and mounting surfaces

Face Mount Configuration

Clevis Mount Configuration

GTF Configuration Options

- 1 – Hygienic face cover with EHEDG Bolts (only with rear clevis mounting options)
- 2 – IP69K Extension cable with flying leads
- 3 – IP69K Extension cable with M23 connector
- 4 – IP67 Rotatable M23 connectors for motor power and feedback
- 5 – IP67 Rotatable M23 connector for single cable systems
- 6 – Metric/Imperial Male/Female rod end threads
- 7 – Metric/Imperial stainless steel front flange
- 8 – Stainless steel rear clevis (only with rear clevis mounting options)
- 9 – Rear power-off holding brake
- 10 – Stainless steel anti-rotate (only with front flange)

Estimated Service Life

GTF060

GTF080

GTF100

Service Life Estimate Assumptions:

- Sufficient quality and quantity of lubrication is maintained throughout service life
- No mechanical hard stops (external or internal) or impact loads
- No external side loads
- Does not apply to short stroke, high frequency applications such as fatigue testing or short stroke, high force applications such as pressing. If your application requires high force over a stroke length shorter than the length of the rollers/nut, please contact Exlar for additional details on calculating estimated service life. You may also download the article "Calculating Life Expectancy" at www.cw-actuation.com

The L_{10} expected life of a roller screw linear actuator is expressed as the linear travel distance that 90% of properly maintained roller screws manufactured are expected to meet or exceed. This is not a guarantee and these charts should be used for estimation purposes only. For additional details on calculating estimated service life, please refer www.cw-actuation.com.

The underlying formula that defines this value is below. Travel life in millions of millimeters, where:

$$L_{10} = \left(\frac{C_a}{F_{cmf}} \right)^3 \times \ell$$

C_a = Dynamic load rating (lbf)
 F_{cmf} = Cubic mean applied load (lbf)
 ℓ = Roller screw lead (inches)

Speed vs. Force Curves

These charts represent typical linear speed versus linear force curves for the GTF actuators using common brushless motor amplifiers. The GTF Series are compatible with many different brushless motor amplifiers; any differences in the performance ratings of these amplifiers can alter the actuator's performance. Thus, the curves below should be used for estimation only. (Further information is available by contacting your local sales representative.)

Elevated Ambient Temperature Operation

The speed/torque curves are based on 25° C ambient conditions. The actuators may be operated at ambient temperatures up to 65° C.

Elevated Ambient Temp Factor (%) =

$$100\% \times \sqrt{\frac{\text{Max Rated Temp } [\sim 130 \text{ } ^\circ\text{C}] - \text{Environment Temp } [\text{in } ^\circ\text{C}]}{\text{Max Rated Temp } [\sim 130 \text{ } ^\circ\text{C}] - \text{Rated Ambient } [\sim 25 \text{ } ^\circ\text{C}]}} =$$

Options

Motor Winding / Voltage

GTF actuators can be operated at a wide range of voltages (up to 460 Vac). Refer to the mechanical/electrical specifications for motor torque and actuator rated force.

4	460 Vac Max
---	-------------

Internal Holding Brake

This option provides an internal holding brake for GTF Series actuators. The brake is a permanent magnet brake that is normally engaged. Power must be applied to the brake to disengage the brake.

Feedback Device Options:

Resolvers

Incremental Encoders

Absolute Encoders

Exlar GTF actuators are compatible with a variety of drive platforms available today. Exlar installs, aligns, and wires feedback devices to mimic a typical motor's wiring and cabling commonly used with the listed amplifier manufacturer (see wiring and alignment section for details). If your wiring and alignment is not listed, please consult Exlar.

Mounting Options

To help you save time and cost on hygienic machines, the GTF linear actuator is designed for two different mounting methods: **face-mounting and rear-clevis mounting**.

The GTF face mount option provides a simple means for customers to completely seal the face of the actuator to a mounting plate on the machine system.

The GTF clevis mount option provides a hygienic face plate and stainless-steel rear clevis mount.
